

Ladies and Gentlemen,

I have reviewed the financial reports. I see nothing appearing that is of concern to me. I would, however, prefer the report to be presented in a more professional manner.

There are many undefined items. Additional sub-categories would help as would footnotes. The presentation wastes too much space on the paper and the electronic version. I suggest using a larger font and narrow the columns for additional legibility.

I would like to review the financials at a later date when the report is formatted as I have suggested. I am sure that QuickBooks in conjunction with Excel would provide that ability.

Joseph W.
